

# **SUPERIOR PLANT-BASED MEATS** **PURPOSE-BUILT** **BY CHEFS,** **FOR CHEFS**

**HUNGRY  
PLANET®**

# PURPOSE-BUILT BY CHEFS, FOR CHEFS

**Hungry Planet® provides superior plant-based meats for foodservice clients**

**Complete solution** for crafting plant-based versions of your best, most popular dishes across the entire menu for any venue, any cuisine

- Industry-leading plant-based Chicken, Beef, Pork, Turkey, Lamb, Crab, Chorizo, Italian Sausage, Breakfast Sausage, and value-added forms...all available now, at scale
- Enabling your breakthrough category leadership with plant-based meats tailored to your requirements, without compromise; free from the constraints inherent to other plant-based meats
- New pre-cooked options increases throughput, reduces time to plate, reduces labor, and fits seamlessly into existing preparation processes

**Plant-based meats that are demonstrably better for personal health**

- Our meats are packed with fiber and have half the calories, one quarter the fat (no saturated), and as much or more protein compared to conventional meat and other "gen one" plant-based meat brands
- Diners expect plant-based meals to be healthy, and Hungry Planet® meats uniquely deliver industry-leading nutritionals

**Chef-crafted** with foodservice chef/operator's needs in mind – flexible and ready for customization to fit your operation's needs

- Lead with plant-based offerings that differentiate your brand with bespoke culinary solutions
- Hungry Planet® wins on authentic taste and texture because we start with the finished dish in mind (not the technology deployed)

**Agile engagement model** and supply chain

- Culinary expertise, led by a Certified Master Chef, to co-develop bespoke plant-based meat solutions leveraging entire range of plant-based meats
- Supply chain built to provide turnkey capabilities from raw formed and bulk plant-based meats, to pre-cooked and pre-portioned menu builders, to RTE and complete meals

**Brand that communicates quality** enabling your brand to be the star of the show

- Domestically sourced
- 100% non-GMO ingredients
- Branded, "powered by", private label, and co-developed solutions

**Founder-led and mission-driven** company based in the Midwest that is an established leader at the forefront of creating the plant-based meat industry

**Partnership with Post Holdings provides the resources needed to scale** and deliver Hungry Planet's full range of plant-based meats to a much wider audience while also offering complete plant-based solutions paired with JUST Egg (in collaboration with Michael Foods, a division of Post Holdings, that has the exclusive license for foodservice)

## WHAT ARE YOU HUNGRY FOR?

Please contact us to learn more or if you would like to discuss a strategic co-development relationship with Hungry Planet.
